JREZ ® 6-1 PRODUCT DATA SHEET

THERMOPLASTIC ACRYLIC RESIN SOLUTION

FEATURES: JREZ 6-1 is a highly compatible acrylic resin that can be used in combination with many other resins. It is a vehicle for aerosol paints, a grinding vehicle, a size coat for hot stamping foils, and a general purpose thermoplastic resin solution. In contrast with most acrylics, which are poor pigment grinding vehicles, JREZ 6-1 can be added to other solution thermoplastic acrylics to improve pigment wetting. In alkyd systems, it improves solvent resistance, speed of dry, and exterior durability.

DESCRIPTION: JREZ 6-1 is a thermoplastic acrylic resin solution of medium hardness designed for use as is or with short or medium oil alkyds.
